Quality Assurance Grants Programme 2011

This Programme is conducted according to the Medicines Australia Code of Conduct

ANZSN-Amgen

Quality Assurance Grants Programme 2011

Significant patient numbers and conflicting priorities in the care of an individual patient, mean that the management of CKD presents important day-to-day challenges.

Simple novel initiatives such as introduction of management algorithms for anaemia, mineral metabolism or vascular access may produce benefits for patient care which are beyond expectations.

Amgen Australia are proud to announce that through the ANZSN it will support the nephrology community by providing five grants of \$10,000 each to support projects aimed at improving patient care and clinical outcomes.

The projects for which the grants will be allocated should address the care of pre-dialysis, dialysis or transplanted patients. Initiatives that improve both efficiency and quality of services will be given special consideration.

Applications are welcomed from nephrologists, nurses and allied health care professionals and should include a brief CV of the applicant, an outline of the proposal, estimated budget and a timeline for the project (a maximum of 4 pages). They will be reviewed by an independent panel of judges representing ANZSN, RSA and KHA.

Applications should be submitted electronically to anzsn@nephrology.edu.au by Friday October 28, 2011 and marked for the attention of "The QA Grants Programme Review Panel". Successful applicants will be announced on Friday December 2, 2011.

Further application details are available at:
www.nephrology.edu.au
